

Cisco ONE - Switching

With the introduction of the new Catalyst 9000 family we saw the introduction of a full term Cisco ONE license next to an existing perpetual license. This rises a fair amount of confusion because both options are (and remain) available but not on all switch types, although some switch types support both. The biggest difference between the 2 Cisco ONE options are DNA Center vs Prime Infra, and Term vs Perpetual. This requires some clarification.

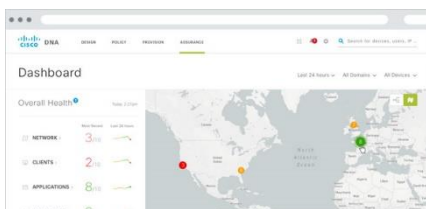

NEW - TERM License (3, 5 or 7 year)

■ License cost (Support included)

Differentiator: DNA Center

--Embedded--
Secure Policy
Simple Design
Proactive Assurance

--External Items--
ETA (Stealthwatch)

1 Flavour*

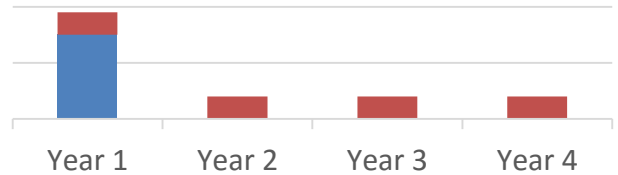

C1 Advantage
